Certified Professional for Software Architecture® (CPSA)

The international Software Architecture Qualification Board (iSAQB) defines curricula on several levels for software architects.

The goal of this module is to equip architects with enough requirements know-how, so that they can take educated architecture decisions, based on the real needs of stakeholders.

The terminology used in the iSAQB curricula can be found as a (freely available) ebook, published on Leanpub.

Development versions

The Req4Arc Curriculum is currently maintained and published in English (EN) only. Maintainers and volunteer reviewers collaborate on GitHub to improve the curriculum.
